SUMMARY

Swindon based web developer, proficient in frontend technologies as well as having a growing knowledge of backend technologies such as Node JS. I have built several apps using front-end technologies such as JavaScript and have incorporated database functionality with MongoDB and Firebase. I'm both driven and excited to expand my skillset and add value in my next position.

EDUCATION

(GTP) Primary Teaching | University of Gloucestershire
2012 – 2013

(BA) Commercial Music | Bath Spa University
2002 – 2005

A-Levels | Swindon New College
2000 – 2002

I have 3 A-levels (BBB) including Maths and an AS-level in Computing

EXPERIENCE

Teacher | Monarch Education
2018 – ONGOING
I've been supply teaching in order to allow me more time to focus on coding experience. I've really enjoyed the diversity of this role and opportunity to work in different teams within schools.

Teacher | Gorse Hill Primary School
2013 – 2018
I taught both music and mainstream curriculum in primary schools. I feel that the organizational aspects of teaching are particularly transferrable to web development and software engineering, for instance, using elements of lessons in a component like, recyclable fashion. I've had experience with lots of problem solving, which should hold me in good stead.

Musician | FD Entertainments
2006 – ONGOING
Performances and digital audio production using samples and synthesis.

SKILLS

- HTML, CSS, Javascript, React JS
- Experience using various javascript libraries such as paper.js, howler.js
- Version control with Git

- Using DRY concepts
- Experience in jQuery, Node JS, Express and MongoDB
- Gulp automation

PROJECTS

Visit my portfolio for more info: https://kiron-basu.github.io/portfolio-site/

Project Screenshot	Learning Highlights
	Weight Tracker – • DOM manipulation • Flexbox • CSS Grids • Data Persistence
	Portfolio Site – • CSS animations • Gulp automation • BEM organisation • Babel/Webpack • Github Version Control
	Smoothie Builder – • React JS • Stateless/Stateful components • React Router • CSS modules • Lifecycle hooks
